

Professional Summary

A Motivated Software Developer and B. Tech (CSE) student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and Full Stack Development (MERN). Gaining experience in building scalable web applications and REST APIs using React.js, Node.js, and MongoDB. Solved 170+ DSA problems, focusing on writing optimized and efficient code. Currently expanding skill set in DevOps fundamentals (CI/CD, Docker, deployment) and actively building real-world projects.

Skills

Languages: Java, C++, Python

Frontend: React.js, Next.js, HTML/CSS, Tailwind CSS, JavaScript

Backend: Node.js, Express.js, MongoDB, SQL

Tools: Git, GitHub, Visual Studio Code, Postman, Canva

Soft Skills: Teamwork, Critical Thinking, Leadership, Communication

Training

In-Campus Bootcamp Training – Sharda University

May 2025 – June 2025

- Completed 50+ problems of intensive Data Structures & Algorithms training with hands-on LeetCode problem solving, covering arrays, linked-list, stack, queue and sorting algorithms — strengthening algorithmic thinking and coding efficiency.
- Developed a full-stack capstone project and 3+ smaller applications demonstrating end-to-end MERN stack concepts including REST API design, database integration, and responsive UI — receiving positive feedback from instructors.
- Participated in 3 mock interviews, aptitude assessments, and group discussions, sharpening problem-solving speed, communication of technical concepts, and performance under interview conditions.

Projects

AI-Powered Interview Practice Platform | React JS, Node JS, REST API, MongoDB

January 2026 - Present

- Engineered an AI-powered mock interview system generating role-specific questions using AI APIs, supporting multiple job tracks and resume-based customization.
- Integrated a feedback engine evaluating responses on accuracy, clarity, and confidence using a structured scoring model.
- Built an interview history dashboard with performance trend analytics across 5+ skill categories, enabling users to track improvement and identify weak areas through a structured 3-parameter scoring model.

Alumni Network Platform | React JS, Node, Express JS, REST API, MongoDB

September, 2025

- Developed a full-stack professional networking platform supporting 2+ user roles (students & alumni) with role-based dashboards and access control.
- Architected RESTful APIs for user profiles, posts, messaging, and mentorship features with role-based authorization.
- Implemented JWT authentication with bcrypt password hashing, ensuring secure login across 2+ user roles with 5+ protected routes and middleware-based session management.

Job Board | React JS, JavaScript, HTML, CSS

June, 2025

- Built a job portal supporting separate recruiter and job-seeker flows with role-based access control and protected routes.
- Developed a dynamic job listing system with multi-parameter search and filter improving job discovery efficiency.
- Integrated secure REST APIs across 10+ endpoints for job CRUD operations, application tracking, and JWT-based user authentication, enabling complete end-to-end job management for 2 distinct user roles.

Achievements

- Solved over 170+ Data Structures and Algorithms (DSA) problems across platforms such as LeetCode.
- Actively contributed to GitHub repositories, collaborating on projects and following practices in version control.
- Oracle Certified Java Programmer- Demonstrated proficiency in Core Java, OOPs principles, and exception handling.
- Currently learning DevOps fundamentals, including CI/CD pipelines, Docker, and deployment strategies.

Education

Sharda University, Greater Noida, India

B. Tech in Computer Science

Aug 2023 - July 2027

CGPA: 7.7 / 10
